Management: The Keys to Success or Poor Richard's Almanack for the Mail Center Manager

Commonsense advice to help you enhance your value as a professional, as well as how to manage costs and take advantage of technology to improve your process. Discover the principles for achieving success in the mail industry through the sayings of Benjamin Franklin, the original Postmaster General.

Quality Control in Mail Center Operations:

In today's competitive environment, "good enough" is no longer "good enough." Privacy regulations and customers' expectations require mailers to produce defect-free documents, in the right envelope, and with the correct address. This workshop will explain why quality control is important for every mail operation, and how to integrate quality control with your existing processes. Learn the differences between TQM, Six Sigma, ISO 9000 and other quality control methods, and how they can be used in your print and mail operations.

ABOUT THE SPEAKER

Mark Fallon is an dynamic speaker who shares insights gained from a career that spans from a part-time job as a mail clerk, to an officer in the United States Army, from a corporate executive to a successful entrepreneur.
